

## ***State of North Carolina Vendor Registration Upgrade***

---

The Department of Administration is pleased to announce an upgrade to the current Vendor Registration software that serves as the portal for Vendors to register to do business with the state of North Carolina. This upgrade will include functionality to allow Vendors to register for all Department of Administration systems including the Interactive Purchasing System (IPS), the Statewide Uniform Certification (SWUC) Program, and NC E-Procurement @ Your Service in one central location. The upgrade will deliver benefits that will drive Vendor satisfaction and improve business performance opportunities for the state of North Carolina. The upgraded Statewide Vendor Registration application is expected to go live late September 2016.

As this project progresses, communications will be distributed to keep you informed. Watch for updates about the upgrade including more information about available training and an early look at some of the new functionality that will be available.

If you have questions about this upgrade, please feel free to contact the NC E-Procurement Help Desk at 888-211-7440.
